

POLITICAL. DEMOCRATS WRANGLING.

Opponents of Gaynor Are in Fear of Defeat.

Havens Leads in Fight on New York Mayor.

Latter Issues Statement on Governorship Boom.

[ASSOCIATED PRESS NIGHT REPORT.] ROCHESTER (N. Y.) Sept. 26.—The opponents of Mayor Gaynor devoted today and tonight to preparation for the struggle against his selection for the head of the Democratic State ticket, which now seems likely to be the distinguishing feature of the two days remaining prior to the convention.

The latest of this opposition is difficult to define. Friends of James S. Havens declare that it covers the western half of the State, and some assert that it is an effort to elect the Mayor's nomination outside of New York City.

At present the Havens men head the anti-Gaynor forces and hope to enlist the aid of other candidates on the ground that the elimination of Gaynor is the first requisite toward insuring the success of anybody else, no matter from what section of the State he hails.

The opponents of Gaynor, it is said, will urge Charles F. Murphy, ex-Treasurer of the State, and others that it will be dangerous to elect to such much upon the popular sentiment in Gaynor's favor, expressed by his attempted assassination; that, but for this sympathy Judge Gaynor would not have his present lead for the nomination and that it is not strong enough to weather the strain of a hard campaign.

The Havens men admit that they have no assurance of the support of William H. Hearst if their candidate received the nomination, but they call attention to the fact that the New York editor supported Mr. Havens when he ran for Congress and also that this course cost him the support of Hearst.

At present the Havens men head the anti-Gaynor forces and hope to enlist the aid of other candidates on the ground that the elimination of Gaynor is the first requisite toward insuring the success of anybody else, no matter from what section of the State he hails.

UTAH REPUBLICANS TURN DOWN PLANK FOR DIRECT PRIMARY.

(ASSOCIATED PRESS NIGHT REPORT.)

OGDEN (Utah) Sept. 26.—The direct primary law was the only bone of contention in the Republican State convention held in this city today. After an hour's debate tonight the adoption of a direct primary plank was decisively defeated by a viva voce vote.

The question of the adoption of a direct primary law was before the Committee on Resolutions all afternoon. The vote on its incorporation into the platform was a tie, 15 to 15.

When the platform was submitted to the convention tonight it contained no reference to the subject which was the subject of the debate.

At present the Havens men head the anti-Gaynor forces and hope to enlist the aid of other candidates on the ground that the elimination of Gaynor is the first requisite toward insuring the success of anybody else, no matter from what section of the State he hails.

GOVERNOR TALKS AS WITNESS.

REPLIES TO LIEB CHARGES OF IOWAN.

DES MOINES (Iowa) Sept. 26.—[Exclusive Dispatch.] Gov. R. F. Carroll on trial for libeling John Cowrie, former chairman of the State Board of Control, took the witness stand in his own behalf today and produced the famous affidavits signed by inmates of the State Industrial School, which charged that Mr. Cowrie had been unduly familiar with girls.

The gist of the affidavits by several girls, was to the effect that Mr. Cowrie had asked them improper questions. That he put his hands on them and asked one, Jessie Louchee, to sit on his lap.

"Jessie Louchee, another girl, told me that Mr. Cowrie had asked her to sit on his lap and that he also put his hands on her."

"The State Industrial School found cattle in the yard of milk cows at Glenwood that were diseased and told Mr. Cowrie that the cattle could not be sold. Later the veterinarians reported that the cattle had disappeared and had been sold by Clay Robinson & Company, in the open markets of Omaha. The tag placed in the care of the cowboys when they were removed at Glenwood before the cattle were shipped."

"Gov. Carroll also testified that Mr. Cowrie had been in the Industrial School was bad and destroyed the discipline and that after each visit by Mr. Cowrie there was a noticeable decline in the part of the girls."

"Gov. Carroll also testified that Mr. Cowrie had been in the Industrial School was bad and destroyed the discipline and that after each visit by Mr. Cowrie there was a noticeable decline in the part of the girls."

"Gov. Carroll also testified that Mr. Cowrie had been in the Industrial School was bad and destroyed the discipline and that after each visit by Mr. Cowrie there was a noticeable decline in the part of the girls."

THE PACIFIC SLOPE—What Happened Along the Coast.

ARIZONA TOWN IS PREY TO FLAMES.

(BY DIRECT WIRE TO THE TIMES.)

BISBEE (Ariz.) Sept. 26.—[Exclusive Dispatch.] Cut off from communication with the outside world, Naco, a village of 1200 inhabitants located on the border in Cochise county, nine miles south of here, was being leveled by fire, according to word received here at midnight.

At this time the immigration office sent word to Bisbee that the town was doomed, but gave no further particulars. The town has no fire protection, and as most of the buildings are of adobe, it is feared it will be wiped out. The fire started on the American side in the business section. The Palace livery barn and the Naco Hotel are among the ruins.

At midnight the Western Union operator reported that the town was burning up.

The fire was threatening the office and he said he would have to flee for his life shortly. In a few minutes the wire parted. Telephone communication is also off.

PHYSICIAN IS CHARGED WITH MURDER OF EVA SWAN, TYPIST.

(BY DIRECT WIRE TO THE TIMES.)

SAN FRANCISCO, Sept. 26.—[Exclusive Dispatch.] James F. Grant, with the crime of murder, there were no new developments in the Eva Swan case today. Both Grant and Paul M. Parker, the former Stanford University athlete, who is held by the police in connection with the affair, still cling to their stories that they were in no way responsible for the death of the young stenographer.

After a long talk with Parker today, District Attorney Charles M. Fickert ordered him back to the city prison, where he will be held indefinitely.

NURSE EXPLAINS DETAILS.

In a complete statement made today, Miss Marie Messerschmidt, the nurse, who was employed by Dr. Grant, and who says that she saw him place the body of Miss Swan in the trunk, told Fickert and Detective White that she did not witness the murder. She advised him to make a quiet search of the morgue and hospital. Parker did so without finding any trace of the girl.

Parker denied that he was responsible for the girl's condition. He declared that a number of persons had telephoned to the home during the time that she was in the hospital, inquiring as to her condition.

Dr. Grant, Fickert said, would be held in custody until further investigation could be made.

RUNNING A DRIFT.

FROM FAR AND NEAR MINING MEN HERE.

**President Brings Up the Principal
Issues in His Opening Address.
Pinchot Talks Conservation to the
Developers, Who'll Reply.**

THE thirteenth annual convention of the American Mining Congress was called to order yesterday morning at the Mason Opera House. The thirteen-inch gun of the week's programme was fired in the evening, when Gifford Pinchot talked "conservation" to men who were very interested and sympathetic to development. There was no retort in this first demonstration but today and for the rest of the week the mining men will reply with the rattling guns of argument and resolutions.

The men who have assembled for the Mining Congress are not the men of blue flannel shirts with pick and shovel over their shoulders, although many of them have worn the shirt and wielded the implement. They are the men of finance and science who have developed mining from the ineffectual washing of sand in a pan to the intricate processes of chemistry and physics. They are the men who have wrestled with the legal and economic phases of mining as one of the important industries of the nation. They are men who are making the hidden wealth of the land contribute to the national resources.

To these men Pinchot talked conservation. They listened attentively, but many of them shook their heads. They believe the great strides which the country has made in the past few years, especially in the West, are largely due to the spirit of enterprise which has been shown by the pioneer and the prospector.

Mr. Pinchot said that the opposition to conservation is due largely to a misunderstanding or misrepresentation of the theories of the conservationists.

"I have said," he said, "the benefit of as large an amount of opposition to my policy as is enjoyed by most people. I find that the people who are opposing conservation are not opposing what I think or what any conservationist advocates, but what they think that I mean by conservation of the national resources."

The first proposition is very simple—that the national resources belong to the people and should be administered and perpetuated for the benefit of all and not a few.

"The water power and such perpetual sources of wealth should remain under public ownership. The waterways should be made of use to the people in every way possible.

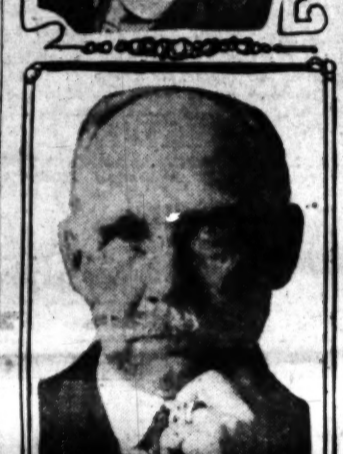

"We should apply the same foresight and careful management to public property that we do to private property."

There is now forming a great combination of power interests and banking interests of the country to control one of the greatest of our national resources. We have been doing something to prevent this. You know that when you attack water power you attack the financial centers of the nation.

"It is not true that we are trying to take away from the State what right they have. We have urged every water-power site now under State or Federal control should remain so and should be leased only for a limited period of years and with a provision of revenue to the public."

"All the forest necessary to public welfare should be under public control. Protection is the first step and reforestation the second. We should take the land not the timber until it is out. Land monopoly and excessive land holdings should not be tolerated."

"The people who have said that we want to arrest or check development are mistaken. We believe that this generation has a right to all that it needs, but that it should not waste the basis of prosperity for coming generations."

Two of the Leaders.

President Buckley, American Mining Congress, above, and D. W. Brunton, President American Institute of Mining Engineers, director of the congress.

the most alluring reports at so much per thousand words.

"They are often more dangerous," he said, "than the promoter whose mine is merely a candle in the air."

He also criticized "fake promotion" as one of the evils of mining, and urged the enactment of State laws taxing mining ventures on their stock issued as one of the best means for the prevention of over-capitalization.

Speaking of mining stocks, he said their fluctuations seldom depended upon the earning power of the property itself, but were the result of a system of buying and selling, chiefly on margin, which was nothing more or less than gambling.

"I trust," he said, "that there may be some way suggested by which this racket can be brought about a better, safer, sounder condition in the stock markets of the country. I may suggest that one way of doing this is the importance of issuing companies monthly or bi-monthly reports covering in detail the condition of the property."

On the subject of conservation, Mr. Buckley said:

"Four things appear to be perfectly

PASSING OF LOVABLE WOMAN.

Wife of Los Angeles Pastor Summoned by Death in Her Home Yesterday Morning.

Mrs. E. Ballo McKnight, wife of Rev. Jesse R. McKnight, pastor of Magnolia-avenue Christian Church, died at her home, No. 1135 West Twentieth street, yesterday morning. The deceased was a consecrated and lovable woman, possessed of talent and of devotion to the work of her husband. She came to this city seven years ago with her husband, who sought a change of climate in order to benefit his wife's failing health, and she at once gained the affection of all who came in contact with her. Mrs. McKnight, whose maiden name was Metcalf, was born at Girard, Ill., May 29, 1868; was educated in Eureka College, Illinois, and was married to Rev. Mr. McKnight, 1889. Besides her husband, she leaves one son, Harold, who is a student at Stanford University, and a daughter, Geraldine, a student in the Los Angeles High School. She also leaves a sister, Miss Mabelle Metcalf, in this city, and three brothers in Illinois.

Funeral services will be held in the Magnolia-avenue Christian Church, and interment will be in Rosedale Cemetery, but the time of the services has not yet been fixed.

**GOOD-BY:
NO METHODIST
MINISTER LEFT.**

**THIS CITY WITHOUT PREACHER
OF THAT CHURCH.**

Special Train Carries Members of Denomination North to Attend Annual Conference at Fresno, at Which All Pastors in District Are Compelled to Be Present.

Not a single Methodist minister able to sit up and take nourishment remains in Los Angeles today. For one week every member of the Methodist Church in Southern California will have to go to Fresno to get married by a preacher of his or her church, if the knot is to be tied that way. Funerals, too, during this time, will be conducted by pastors of other denominations.

A special section of the Valley Line train No. 7 started for Fresno last evening at 9:45 o'clock, from the Arcade station, with 150 Methodist ministers and their families. There were five coaches, second section, and they were filled exclusively with exponents of salvation by the Methodist route.

The officials of the Southern Pacific provided the special, but did not send it out as "personally conducted." Somehow or other "not a man was available."

It was a jolly party just the same, which boarded the cars, and nobody was late.

While this delegation to the Annual Conference of the Methodist Church, which lasts one week in Fresno, goes in a "special," its members will return by various routes and, individually, many of them, it is announced, will take the opportunity to make side trips to San Francisco and points of interest after the conference.

The conference will be called to order tomorrow morning and it is the rule that every minister in the district shall attend. Besides the preachers the four superintendents of the Southern California district are also in attendance. Superintendent Larkin and Pitts were among the delegation which started north last evening from Los Angeles.

Meanwhile, a number of weddings will be postponed until the return of those who "officialize."

**NOT DOOMED.
RAILWAY WILL
BE MINE HOST.**

**CASA VERDUGO TO CONTINUE TO
FEED HUNGRY.**

Pacific Electric Company Believes It Can Operate Hacienda Itself to Better Advantage Than Through a Tenant—Violation of Lease by Senora Yorba Is Charged.

In spite of the fact that the lease on Casa Verdugo, now held by Senora Frieda Yorba y Sowl, will be terminated November 1, by the Pacific Electric Company, the owners, that termination will not mean the end of the historic hacienda. It is the intention of the company to operate the casa along the same general lines that have made it a famous resort through all of Southern California, but directly, rather than through a lease to a second party.

According to statements made yesterday by the railway officials, the property owned by Senora Yorba y Sowl for the Spanish dinner, to be given the delegates to the bankers' convention, which price was assessed to be considerably in excess of those ordinarily charged for much smaller parties.

Commenting on the situation yesterday, General Manager McMillan of the Pacific Electric Company said:

"The action of the company in taking over the lease of Casa Verdugo is the result of experience with Alpine Tavern, which has proved a success operated directly by the company. Casa Verdugo was built in the first place as an attraction to boost the traffic over the Glendale line; the present occupants of the house were given the lease free for a period of about three years and for a time, the company carried freight free for the operators of the restaurant. Their refusal to aid in Southern California's development in doing their share to ward advertising it among the bankers has caused the lease to be terminated, as this lease has carried, throughout its existence, a clause which requires the operation of the restaurant to be carried out along lines

OIL INDUSTRY IS ATTACKED.

**Union Gang Starts Reign of
Terror at Coalinga.**

**Usual Tactics Mark Latest
"Organizing" Attempt.**

**Employers Are Taking Steps
to Protect Workmen.**

The oil fields are the latest object of attack on the part of the labor union conspirators.

Defeated at every quarter in their mad attempt to saddle this city with their rule, the San Francisco "bosses" have turned their attention in another direction, hoping to make local manufacturers bow their necks to the yoke by paralyzing one of Los Angeles' most important industries.

Nearly twelve times the iron and steel business that San Francisco can boast of is transacted here, and the oil fields form the most important market. Practically every tank or line of pipe that is now being installed went from local iron works, and the great majority of the workmen employed are on the pay rolls of Los Angeles establishments.

The Coalinga field meets with union ideas of a desirable scene of operation. It is more or less isolated, the police force is of small importance, and the imported thugs have been allowed to run things to suit their own sweet will.

The most disreputable districts "south of the slot" in San Francisco have been called upon for ruffians to enter Coalinga, jail birds, strong-arm men and ex-prize fighters have been enlisted and sent to the oil fields to best loyal, free workmen into submission.

For weeks the unionists ran things with a high hand. The peace officers either were lethargic or powerless, and made little or no effort to pro-

On All News Month, 5 CENTS.

fect the threatened laborers. Assaults were of almost daily occurrence.

Last week conditions reached a crisis, when a mob of some thirty unionite ruffians set upon five loyal workmen and pursued them into a workway.

STRIKES WRONG MAN.

Just as the leader of the thug gang reached the curb, one of the pursued whirled about and warned the mob to halt.

"Hell with the Dago," he shouted, "beat him up," shouted the leader of the gang.

The man at bay reached for his hip pocket, pulled a revolver, and fired a shot into the sidewalk. The unionites showed their customary courage and fled.

Rafael More, the man who fired the shot, was jailed.

The arrest of More warned the employers in Los Angeles that they must take steps to protect their men in the oil fields. Attorney Earl Rogers hastened to the scene of the trouble to defend the man in court. When the case came up for trial, More was released in short order and twelve of the unionites were taken into custody.

Rogers then went to the City Trustees. He showed them the necessity for taking steps to protect workmen; and that body immediately issued an order that all violence was to be suppressed. The next day the business men of the community took a hand themselves and gave it as their ultimatum that attacks must cease or some one must suffer.

ONLY A REPETITION.

The story of the Coalinga outrages is but a repetition of what happened at San Luis Obispo a short time ago. Thugs and ruffians from San Francisco flocked into that city in response to the call of the unionite bosses, and tried in every way to drive loyal workmen from their jobs.

Today Attorney Rogers will leave for Fresno to secure an injunction, restraining the unionites from interfering in any way with the workmen in the oil fields of that county. The iron works proprietors are determined to protect their men and ruffianism will be put down in short order.

The rapid growth of the oil fields made it impossible for the operating companies to build tanks and pipe lines to tide water fast enough, and in consequence all of the large iron works of this city are pressed to their utmost to handle the contracts which they already hold. If the work is not completed in contract time, some of the wells must close down. This would mean heavy loss to the operators and

(Continued on Sixteenth Page.)

NEW BUILDING OPEN UNDER FAIR BANNER.

WITH BARED HEAD, glistening eyes and a patriotic smile on his lips, Federal Judge Wellborn yesterday morning pulled "Old Glory" to the very tip-top of the flagstaff on the roof of the new Federal building.

"Flag of our country, wave on! wave ever! over a land of liberty and law and order!" exclaimed the magistrate, as a soft breeze caught the folds of bunting, which had never before been flung to the winds.

He gazed at it a moment in silent adoration, then turned with beaming face to the few who had been permitted to witness the scene.

By this act the judge formally dedicated the new structure, to the use of the government officials. An hour later he ascended the bench in the new District courtroom, and for the first time sat in an official capacity in the new structure.

Realizing that the flag would have to fly above the structure before court convened, Assistant Postmaster Dismann, who is in active charge of the building, decided that Judge Wellborn was the proper person to raise it for the first time. The magistrate appeared pleased to perform the act, for he has served the government in a judicial capacity for many years.

The officers of the courts were notified at 9 o'clock that their presence was required on the roof. In a short time they assembled, and a few minutes later the red, white and blue was waving in proclamation of the government's occupancy of the new building.

"When Mr. Dismann invited me to be present this morning, I bargained with him for exemption from speech making," said the judge. "Now that I am here, however, I want to thank him for the notable part in the exercises assigned to me, and I can say, without exaggeration, that I took upon it as one of the chief distinctions of my not altogether uneventful life."

And now, as we give to friendly winds this emblem of American nationality, covered all over with imperishable glory, we can but exclaim, flag of our country, wave on! wave ever! over a land of liberty and law and order!"

Smiles were in order all over the building, yesterday. No one who had moved in had a cause for complaint. The government saw to this before-hand, the plans having been submitted to the head of each department before they were finally accepted.

The Land Office moved on Sunday. By dint of hard labor from early morning until late at night, everything was put in order for opening yesterday. Other departments were not entirely

Up Goes the Flag!

Judge Wellborn hoisting "Old Glory" on the new Federal building, yesterday morning.

put away in uniform order. All day the vans continued to unload at the rear. On Thursday the Postoffice will be transferred.

Yesterday morning the Citizens' Committee on Celebration of the Opening of the Federal Building arranged the following incomplete list of speakers for that event, on Wednesday evening of next week. The president of the evening will be Joseph Scott, and he will be introduced by Milton Carlson, chairman of the Citizens' Committee. Mayor Alexander, Motley H. Flint, response, Joseph Meener, Hon. R. F. Del Valle, Will D. Gould, Rev. Dana Bartlett, J. E. Muchmore, supervising architect of the building and J. M. Dougen, representing the contractors. Bands likely to participate.

Mrs. M. C. Gonzalez will sing "The Star Spangled Banner," in front of the Speakers' platform.

La Cinquintaine, mandolin and guitar trio will play during the evening in one of the United States court-rooms.

Ten thousand official programmes will be distributed, also different kinds of badges for executive officers, committees and vice-presidents.

Representatives of all commercial bodies, bank presidents, Federal officers, city and county officials, Native Sons and Daughters of the Golden West, State officials, consult and vice-consuls, judges, Mayors, and Chamber of Commerce officials of surrounding cities, and the Pick and Shovel Club of Venice, have been invited.

Gov. Cochran and officers and veterans of the Soldiers' Home, besides the Home Band, have been invited.

Provision has been made by street car companies to stop traffic in the vicinity of the Federal building during the exercises.

Joseph Meener's address will contain a brief account of how the Federal building was secured for its present location, and John G. Mott will be a vice-president and occupy a seat of honor

THE OIL INDUSTRY.

DRAINAGE IS THE CRYING NEED.

Work on Reservoirs at San Luis Obispo.

Considerable Lakeview Oil Now Being Handled.

General News of Interest From Oil Fields.

The first of the Producers' Trans-Pacific Company's two big concrete reservoirs at San Luis Obispo is due to be started by October in accordance with present calculations. The second will follow later.

Under way. The reservoirs are constructed of concrete, 60 feet inside diameter, twenty feet four and one-half inches high, and will cost \$125,000 each. Each reservoir requires the excavation of 80,000 cubic yards of earth. The walls, which are three feet thick at the bottom and six inches at the top, will consume 15,000 tons of cement. The floors will be reinforced with wire mesh. A clatern pump, eight feet deep in the center of each reservoir, can be drained by a pipe leading to the outside. Grated earth will be banked up outside of the walls, all the concrete is supposed to be waterproof to serve the purpose intended.

Estimated 15,000,000 barrels of oil annually ordered by the agency, nearly at least three additional million barrel capacity.

Number of the steel tanks at the end of the Producers' pipe line completed, but they are now filled with oil as fast as it comes and there is now no room for the Producers' pipe line. At the rate of 10,000 barrels per day—almost exactly the same as the output of the pumps at Maricopa, American Oilfields is pumping 10,000 barrels per day into the tanks of the Producers' pipe line at McKittrick. The McKitticks were an additional 10,000 barrels removed from Coalinga, and 10,000 barrels forced over the line. The Santa Fe is carrying very small quantities of oil in the same line as the American, but no other oil is being carried.

DRILLING IN NEW FIELD.

Drilling has been started in the new field of light oil, in township 32-N, range 10-S, east and east of the Devil's Rock. The Times Monday morning announced interest among oil men in the northern fields.

Drilling in number, were put down in the new field. In the new field, the oil wells, that of the surface, the oil companies are in the new field secret, visitors are made to keep the oil fields. The information being ordered company is a well, is from a man who saw the oil.

The new field is about 10 miles west from the town of Wasco, and the oil is about four and half miles from the town of Wasco. The companies, associated, are largely Mexican people, including I. T. Bell, Judge Walcott, and others.

A number of Visalia people interested in this end of the district for ten years ago, have been active in the district. Recently, however, there has been made, with a view to tie up land in the district, and the land has advanced to \$100 per acre in some places. The wells are located on the hills on gently sloping ground.

WATER SYSTEM.

SIDE FIELDS.

The Producers' Trans-Pacific Company will install a water system through the side holdings in Kern county, which the company's main water system is being increased by the installation of two large boilers, and a water tower. The water will be pumped from the center of operation.

The company has already begun work on section 35, the Sare and Regal roadways, which the company is developing. The company is erecting a new stage lease and the company is contributing to the campaign development of the Union as president. Many other company men are working on the new field.

OPERATIONS.

TWO WELLS.

The Producers' Trans-Pacific Company, at a depth of 100 feet, encountered a showing of shale. This is considered a good thing, as none of the wells got this showing.

Hewitt believes that the chances for finding oil in this depth than the one he anticipated that oil was about 2300 feet below the surface. On 21-22, the Pyramid encountered a depth of 1585 feet, and the company indicated a showing of gas. The "stick" was getting into the gusher.

LAND FIELD.

OWNED BY O.E. MAN.

The company is now leasing the entire oil field. Recently he has obtained all the rest of the water rights. He is said to be \$65,000 worth of water rights heretofore such small parcels of land. A systematic drilling of wells to a

HE TALKS TOO MUCH.
 San Francisco Labor-Union Picket Jailed Within a Few Hours of His Arrival Here.

T. H. Cartwell, a loud-mouthed labor-union picket, who says he came from San Francisco, stayed in Los Angeles just about six hours before he was shown the City Jail last night. Cartwell, as soon as he arrived, began to fill up on beer. He thought it was all pretty "fair" beer, too, and kept at it until he lost discretion. In the Palace saloon, First and Spring streets, he stood up to make a speech which consisted mainly of profane declarations that he was a member of the Western Federation of Miners and an all round bad man. He talked freely of dynamite, and when he announced his intention of killing twenty "scabs" before leaving town in the morning, a little undertaking for which he said he was well provided with tools, the police were called in. Detectives Zeigler and Hosick took him to the Police station, but they have not been able to find any of his dynamite. Cartwell was booked as a drunk.

WALNUTS PLACED HIGH.
 Growers Hold Secret Session and Fix Greatest Price Ever Demanded in California.

One of the most important meetings held in this city for a long time was that of the Walnut Growers' Association, held yesterday behind closed doors, in the Chamber of Commerce. It was attended by about 150 growers, and after the discussion was over, in which the shortness of the crop was discussed, and the season's price of nuts fixed, they gave out the following as the prices that will be demanded for the crop of 1910: Ruddled nuts, 17 1/2 cents per pound; No. 1 soft shell, 15 cents; standard, 14 1/2 cents; No. 2, 11 cents. These are the highest prices ever quoted for English walnuts in the history of the industry in Southern California.

SOME BIG TOMATOES.
 A. A. Armstrong, living at No. 4129 Gramercy place, this city, yesterday placed on exhibition at the Chamber of Commerce, some tomatoes of the "Tenderloin" variety grown on his place, that are to be counted among the "big things." They weigh from one and three-quarter pounds to two and one-half pounds each, and are of handsome shape and color.

Fashion Show

No woman who appreciates elegance and individuality in articles of apparel should miss the Robinson Co. exhibits.

MILLINERY—Pattern hats from the most noted designers of Paris and New York—hats which will prove invaluable in the cheaper materials.

WOMEN'S SUITS AND GOWNS—Gowns from Paris, suits from New York—masterpieces from the foremost designers. Nothing commonplace about them, yet they are not priced prohibitively high.

MISSSES' APPAREL—Exceedingly rich and absolutely exclusive dresses for girls as well as for grown-ups—the Misses' Department is not a neglected side issue in THIS store.

IMPORTED SILKS—Single pattern lengths of many luxurious fabrics from France. Direct importations—no importing jobbers' profits for you to pay.

DRESS TRIMMINGS—Every sort now in Fashion's favor, and plenty of the metal band trimmings, in Persian colorings, for hobble skirts.

"TREFOUSSE" GLOVES—The finest France produces—sold in no other Los Angeles store.

THE NEW RIBBONS—6 to 9-inch embroidered velvet ribbons are to be extensively used for hobble-skirt bands, as well as for millinery purposes, \$1.50 to \$5.00 a yard.

5 to 12-inch Persian ribbons, 50c to \$2.00 a yard.

ROBE PATTERNS—Dozens of distinctively new effects in chiffon and net and in metal cloth. Prices \$32 to \$125.

The House of Biehl
 Importing Tailors

ROBETH TWEED is a clean, bright leathery weave that makes up smartly. We control the importation in this section and can promise the exclusive sale. A suit of this has character—it has individuality, not to be duplicated by any other tailoring house in Los Angeles.

Knickerbocker Tweed in Greens, Tan and Brown is another new importation which will interest you. Just the thing for young men. Beautiful, rich texture—excellent for the Autumn season.

Men's Made-To-Measure Outer Garments for Business Wear—\$35 to \$60.
 516 South Broadway

GRAY HAIRS BANISHED
 The old idea of using sage for darkening the hair is again coming in vogue. Our grandmothers used to have dark, glossy hair at the age of seventy-five, while our mothers have white hair before they are fifty. Our grandmothers used to make a "sage tea" and apply it to their hair. The tea made their hair soft and glossy and gradually restored the natural color. One objection to using sage preparation was the trouble of making it, especially as it had to be made every two or three days on account of its souring quickly. This objection has been overcome, and by asking almost any first-class druggist for Wyeth's Sage and Sulphur the public can get a superior preparation of sage, with the admixture of sulphur, another valuable remedy for hair and scalp troubles. Daily use of this preparation will not only quickly restore the color of the hair but will also stop the hair from falling out and make it grow. It is sold by all druggists for 50c and \$1 a bottle, or is sent direct by the Wyeth Chemical Co., 74 Cortlandt St., New York City, upon receipt of price.

For sale and recommended by Sun Drug Co.'s Stores.

Interest Intensified In the Los Angeles United Fashion Show

DELINA PATTI is said to have once remarked to a friend that she was satisfied to know in her heart that she could sing high C, though she had never made the attempt.

In much the same way, sometimes when such masterful events occur as the present splendid show of fashions, it has seemed that if we could put into words the full, powerful force of the display before you, all feminine Los Angeles would be here when the doors of the store open each morning.

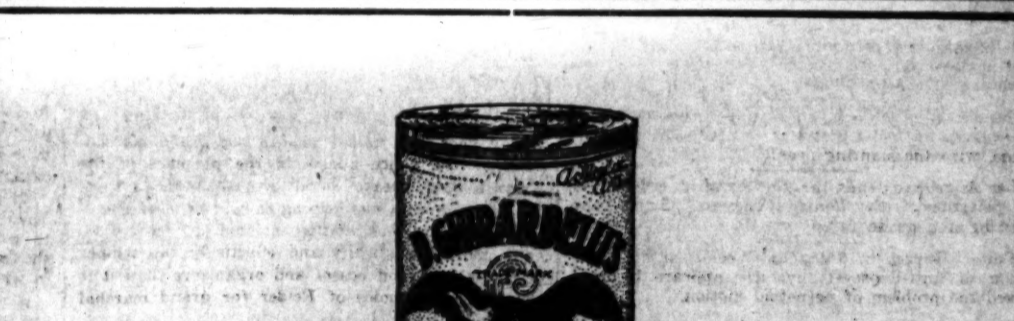

But if you will stop to think a minute, you will recall the fact that this store never has, so to speak, tried to sing high C—every value has been a little bit better even than you expected, and a great deal better than any announcement gave you the right to expect. These things you know to be true; and we have not deviated from this policy.

So, instead of the adjectives that might be employed in regard to this three days' exhibit, we shall rely simply upon the evidence of your own sight and lips for corroboration of our assertion of the truly unusual character of the various displays with which every section of the store is full.

We ask you to consider this a very personal and cordial invitation to make use of the store—of its wonderfully complete stocks—of its rest rooms, its telephones, its writing desks, its Cafe and Men's Grill—in short, of every convenience which thirty-two years of continuous serving of a discriminating public has enabled us to bring to perfection and to place at your disposal. Welcome!

Conductor Dry Goods Store

A Poor Resemblance

The imitations of Ghirardelli's Ground Chocolate bear no resemblance to the original except the use of the name "Ground Chocolate," and that, of course, was borrowed, for there was no "Ground Chocolate" before Ghirardelli's.

There is a reason for the imitating manufacturers adopting this one point of resemblance. That reason is they want you to think the imitations resemble the original in qualities as well as in name.

There is no reason why you should make food experiments for the benefit of these imitators. You know that Ghirardelli's Ground Chocolate is the best for every household use, and the best value for your money. Then why not insist upon having it.

By reading the label to see that it bears the name of "Ghirardelli's Ground Chocolate," you can be sure of getting the original and not the poor resemblance.

D. GHIRARDELLI CO.
 Since 1852.

and the two experts who are directing the important work in the well-equipped institution.

MINING CONGRESS.
(Continued From First Page.)

clear in a consideration of the problem. "First, as mining men, we cannot afford to have the government enact legislation which will make the occupation of mining more hazardous than either respecting the protection of life or the investment of money. Second, that nothing shall be done that will in any way retard the development of our manufacturing industries that depend upon the products of the mines for their business; third, that everything possible be done to increase the percentage of metals that can be recovered from the ore deposits and from deposits of coal, oil and gas; and fourth, to bring about as quickly as possible the use of substitutes for the present sources of power and for the metals which are supposed to be limited in quantity. There should be the fullest development of our mineral resources, under such Federal or State cooperation and regulations as will insure the maximum utilization of waste, it being agreed that our mineral resources should be exploited with intelligence and in a fair and upright manner.

"The question of the ownership of the public domain should be as far as possible be considered apart from that of conservation. In doing this, it should be remembered that ownership that may be otherwise desirable may be undesirable from the standpoint of conservation, and vice versa. The question of ownership is political and sociological, while conservation is technical and scientific."

IN FLOWERY SETTING.
OPENING OF THE CONGRESS.

The opening notes of the congress were those of harmony, whether or not the uppermost question of conservation shall be disposed of as happily. An orchestra played the Tannhauser overture and the curtains rolled up on a bank of flowers and foliage that typified the garden spot of the world to which the delegates were shortly welcomed by representatives of the city, the State, the Great Southwest, the Chamber of Commerce and the Sierra Madre Club.

President Buckley presided and introduced the speakers briefly. Alden Anderson, State Bank Commissioner, spoke on behalf of Gov. Gillett, who was unable to be present. Mining men, as the creators of wealth, he said, are entitled to the support of all men engaged in legitimate enterprises. The State of California, as one of the first in the union to give great importance to mining in America, he promised would give the heartiest welcome to a national congress of mining men.

President Buckley, in introducing Mayor Alexander, warned the delegates that he has a reputation for keeping an eye on every corner of the city and suggested that he might be found waiting at any lamp post should they visit such points of interest about town. Notwithstanding all this, the Mayor handed over a big key to the city and told them he represented one of the most hospitable cities on earth. He advised them when not otherwise occupied to take a look at the surrounding country.

President Scott of the Chamber of Commerce was very happy in his welcome. He advised the delegates to beware of politicians. "Prize fighting," he said, "holds more honor and is more of a recreation. When you knock a man down in prize fighting you only count ten and then he's out, but when you knock him over in politics he is likely to come back for the next four years. Mining men are thrice welcome to Los Angeles. They are people who drag in our western frontiers and extend our civilization. You are the men who made it possible for the poor devil without a cent in the world to dream of becoming a millionaire. You are the men who know how to win the cash and the long game. Mining men are one of the best types of good American citizens."

President "Bob" Montgomery of the Sierra Madre Club related briefly the history that carried him from the ranks of the prospectors to the owner and operator of one of the largest mining properties in the West. He offered the hospitality of the club which is playing the host to the congress. Frank G. Tyrrell followed with an eloquent address upon the Great Southwest, reviewing its resources of metal mining, oil, agriculture, projects of irrigation and power development and predicting a day when it will be generally recognized as the richest part of the earth and the center of the world in all directions.

The afternoon session was largely devoted to a symposium of the States represented, was partially made up at caucuses held during the first day. The following named members had been selected at the close of the afternoon session: Missouri, O. H. Pitcher, Nevada, H. C. Jones,

Arizona, L. W. Powell; Utah, J. A. Jennings; Nevada, George W. E. Dorsey; Washington, D. C., F. L. Ransome; California, E. H. Benjamin; Wyoming, W. M. Fitzhugh; Idaho, H. G. Redwine; Oklahoma, Dr. D. M. Halley; New Mexico, F. J. Utter.

IMPORTANT RESOLUTION.

One of the important resolutions to be acted on by this congress was read and referred to the committee. It came from mining men of Los Angeles—B. Christy, F. W. Bradley, M. L. Requa, C. W. Merrill, W. S. Noyes, A. G. Lawson, Albert Burch, Francis Drake, H. F. Bain, Stuart Rawlings, Charles Jasin, Howard D. Smith, E. H. Garthwaite, Sumner S. Smith, F. G. Cottrell, William M. Rees, S. W. Mudd—and follows:

Resolved, That we endorse the policy of the officers of the United States Bureau of Mines in making their first concern the increase of safety in mining, and we request the extension of this work to cover metal mines as well as coal mines; to that end we urge that rules and regulations for working mines be formulated in cooperation with working miners and mine inspectors, for guidance of Federal inspectors in the Territories, and to serve as a model for enactment by the States.

Whereas, excellent results have followed the laboratory studies of the Technologic Division of the United States Geological Survey.

Be It Resolved, That we deem it of first importance that the United States Bureau of Mines establish a well-equipped chemical-physical laboratory which shall be reserved exclusively for generic and fundamental problems, the solution of which will be of service to the entire industry—such as the safe and economical use of explosives, safe use of electricity in mines, the scientific study of the obscure chemical and physical problems that underlie important metallurgical processes, but that any commercial or private work in this laboratory be absolutely prohibited.

Resolved, That we recommend that the United States Bureau of Mines make special efforts to continually collate the complete and incomplete results of all workers along lines related to mining and metallurgy, particularly on broad and generic problems—as for example the abatement of dusts, age from smelter fumes—and to publish these from time to time.

Whereas, the lack of uniformity and intelligibility, their infrequency and the inadequate character of reports now furnished by the directors of many mining corporations works serious injury to legitimate prosecution of the industry, we believe that for the full protection of investors, every mining company should incorporate in its annual report the following essential items of information: (1) A brief review of the past history of the property, the work accomplished and the results obtained, with tabulated statement of expenditures and receipts from the beginning, marketable products made each year, and the same received from the sale of same, the annual net earnings and the disposition made of such earnings. (2) A similar review, but in more detail, of the work of the year, with statements of the assets and liabilities (these statements to show all details as to capitalization of the company, the number and classes of shares outstanding, at date of report, the respective rights of these shares, the number of shares remaining in the treasury, any options or contracts on such shares, any bonded indebtedness, receipts and disbursements, cost sheet and other information as to work accomplished and results obtained. (3) A statement of ore reserves at the date of the report, compared with the reserves of the previous year, with an estimate by the officers of the company of the probable life of the mine, and a valuation of the property, accompanied by statements of the data upon which such valuation is based.

Resolved, That we recommend that the Bureau of Mines formulate a type of periodical report from directors of mining corporations that shall enable stockholders to form an intelligent idea of the value of their property and which may serve as a model.

Resolved, That we especially urge that reports of all investigations by the United States Bureau of Mines be given prompt publication.

Resolved, That we urge that examination of all lands claimed as mineral in the national forests be made by experts detailed for that service from the United States Geological Survey or the United States Bureau of Mines, whichever may prove the more feasible, to the end that bona fide locators be protected in their rights and prompt decision be rendered in contests.

Davidson, furniture dealers, was taken over by Harry Fryman, the Hayward proprietor, three months ago.

Remodeling was started at once, and fifty additional rooms have been added in splendid style. With the high ceilings and outside exposure, they are the choice apartments of the hotel.

On the lower floor, a flower shop, cigar store and an eight-chair barber shop are among the innovations. Mr. Fryman has also provided a large office for himself in this portion.

The work of art is the buffet. This is a copy of the famous Pompeian room of the Congress Hotel, Chicago. The wood-work is in verte-antique—a greyish green. The art panels along the ceiling and the ruins of the ancient city of Pompeii, with Mount Vesuvius in the background.

The café of the Hayward is being enlarged and will run through from the original hotel basement to the new hotel, occupying a ground space of 10,000 sq. ft.

BIG LAND DEAL.
LEMON COVE, Sept. 26.—Quite the largest land transfer recorded in the history of the Lemon Cove Orange district, is that for which the formal papers have just been filed and by which the Tulare Land Company, Ltd., transfers to Samuel Parker of Honolulu the 1000 acre Wallace ranch.

The transfer was made for \$85,000 cash and the buyers assume a \$15,000 balance on a mortgage of \$55,000 placed against the land some years ago.

In the ranch the greater part of the land is especially well adapted to orange culture and it is stated that next year the new owner will begin operations to level and plant the entire tract to lemons, oranges and pomelos. It is the ambition of Mr. Parker to have, when his plans are completed, the largest citrus grove in California.

FAIR PAVILION BEGUN.
VISALIA, Sept. 25.—Work started yesterday upon the main pavilion which is to be used to house the Tulare County Citrus Fair and it is expected that sufficient progress will be made so that it may be turned over to the fair directors by the end of the coming month.

This main building is to be 60x100 feet in size and upon each side there will be put temporary buildings, roofed with canvas for the machinery exhibits.

While the dates for the fair have not as yet been definitely settled, it is practically assured that the exhibition will open during the first week in December and will be continued for six days.

TEMPERANCE TALK BY WOOLLEY.
John G. Woolley, the well-known prohibitionist and erstwhile candidate for President of the United States, lectured last night before the Men's Club of the Boyle Heights Methodist Church. His topic was the favorite one of temperance reform, and he was listened to with great interest.

RIVERSIDE SCHOOLS OPEN.

Quarter of Million Dollars to Be Spent

in Preparing New Buildings for

Increased Attendance.

RIVERSIDE, Sept. 26.—The High

School and grade schools opened to-

day, with an enrollment considerably

larger than last year. The attendance

figures show the necessity of the prepa-

ration for erecting the new school

buildings, for which a quarter-million-

dollar bond issue was voted this sum-

mer.

Work on the High School annex

will be hurried to completion as rapidly

as possible, to relieve the congested

condition. The addition will have

dimensions of 44x

42 feet, and will be connected to the

main building by a pergola, supported

by twenty-two columns. It will be

used for classrooms until the boys'

polytechnic High School is built, when

it will serve as a girls' gymnasium.

Agriculture will be taught in the

schools for the first time this year,

the curriculum being approved by the

County Board of Education. Athletics in the

schools will be under the direction of

Pre. Featherston, formerly a member

of the State's famous Michigan foot-

ball team, and recently in charge of

the Violet-street playgrounds, Los An-

geles.

Additional equipment is expected

soon for the manual training school,

and prominence will be given to do-

mestic science and manual training.
